

# EARTH BUCKET ES / ES-V

## Application:

The robust Hauer earth buckets are especially designed for heavy-duty applications like handling heavy gravel and other bulk loads and also for excavation.

## Operating principle:

The special design and practical design features a curved bucket with smooth surfaces that ensure no material sticks in the corners. The right-angle edge at the rear is perfect for grading in reverse. The cutting edges in the front end are made from high-grade and hard-wearing 450 HB steel ensuring long life.

The industry-sourced excavator bucket teeth are flush mounted for grading without grooving. No material is left on the ground.

The ES-V earth bucket is also available in heavy-duty specification for serious work.

- Stronger and more under-bucket wear strips
- Extra thick side plates
- Stiffening angle on the top edge
- Stronger scraping angle
- 20mm cutting edge (plus 4mm)

## Advantages:

- Heavy-duty build
- Choice of optional specifications

INNOVATION WITH TRADITION FOR LIFE.

## Standard specification:

- SWE-B mount (Hauer system) or SWE-Euro mount (Euro Hook)
- Standard Hauer orange or Hauer matt black paint finish

## Options:

- Multiple mount options
- Paint finish available in all RAL colours
- second cutting edge
- Bucket teeth
- Heavy-duty design

## Technical data:
