

LIGHT MATERIAL BUCKET LGS-XL

Application:

The Hauer light material bucket LGS-XL allows machine owners to use their front-end loader for handling large volumes of light bulk materials such as grain, woodchips and snow.

Operating principle:

Made from high-quality materials, the bucket features a low kerb weight and a high payload and the curved design ensures the high volume is exploited to the fullest.

Advantages:

- High volume
- Sturdy design
- Low kerb weight

Standard specifications:

- SWE-B mount (Hauer system) or SWE-Euro mount (Euro Hook)
- Standard Hauer orange or Hauer matt black paint finish

Options:

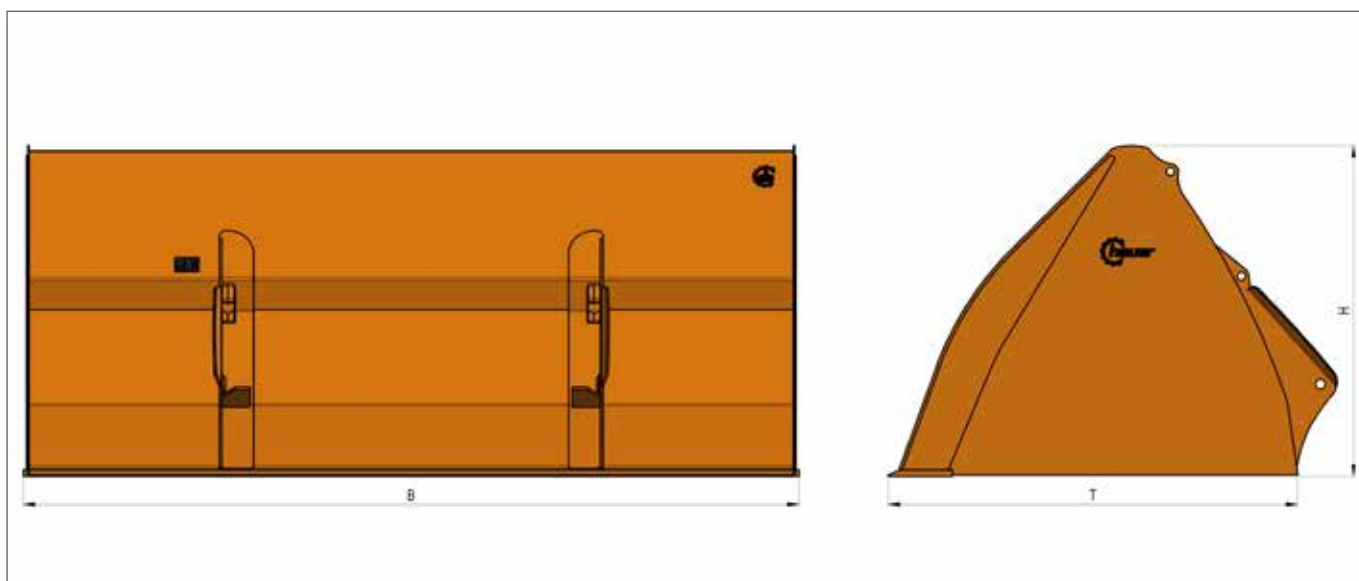

- Multiple mount options
- Paint finish available in all RAL colours
- Additional cutting edge

INNOVATION WITH TRADITION FOR LIFE.
