

ADHESIVE WEIGHT

Application:

The Hauer adhesive weight for 3-point attachment was especially developed for trailer operation.

Operating Principle:

The adhesive weight is constructed in a modular way so that the weight can be extended with plates. The weight is mounted to the lower links and therefore provides space for the trailer drawbar.

Advantages:

- 2 sizes with 7 weight variations each
- Compact and space-saving
- Individually adjustable to the lower links angle with position stop
- Position stop for direct attaching and parking
- As standard with reflector stripes

Type:

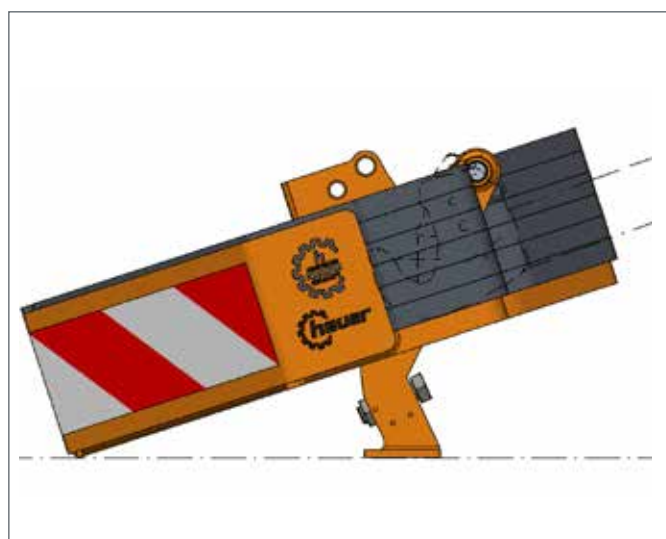

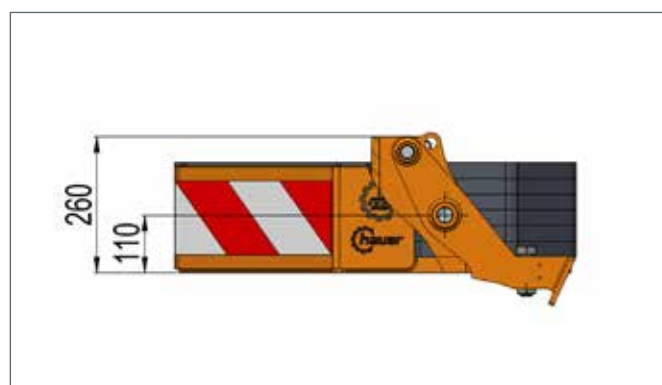

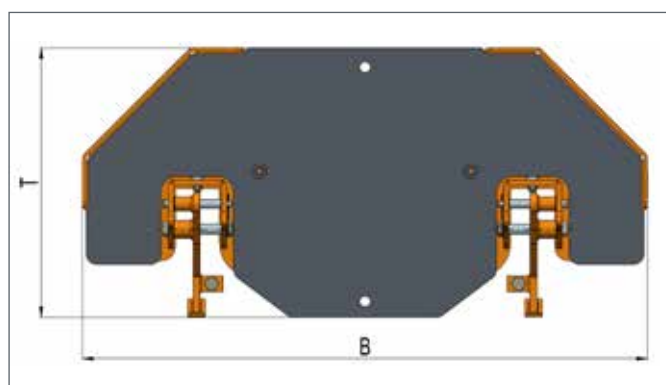

- Hooks category 2/3
- Standard Hauer orange or Hauer black matt (optional all RAL colours)

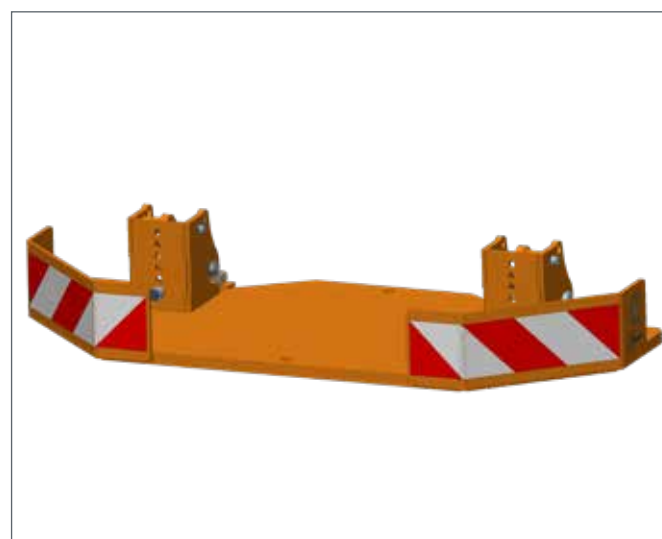

INNOVATION WITH TRADITION FOR LIFE.

Technical data:

Type	Weight plate	Width mm (B)	Depth mm (T)	Hooks cat.	Weight kg
small	0	1600	765	2/3	275
	1				475
	2				675
	3				875
	4				1075
	5				1275
	6				1475
large	0	2000	855	2/3	375
	1				675
	2				975
	3				1275
	4				1575
	5				1875
	6				2175
